

PRODUCT INFORMATION

eaZiflex VITROX

Elegant comfort - that's the new, stylish eaZiflex VITROX pendulum hinge.

The innovative swing door hinge is installed as a connecting piece between a fixed part and a glass door. The pendulum fitting allows to be open the door inwards

and outwards up to 90°. The door fixes itself at the maximum opening.

eaZiflex VITROX opens on both sides and closes automatically from a door position of 70°. Closing is soft and, thanks to the SOFT CLOSE technology, the door centres itself silent to the closed posi-

tion.

eaZiflex VITROX is available in two versions, for mounting on a fixed glass and for mounting on a wall.

Elegance

Thanks to its smooth surface, the pendulum hinge offers a pleasant haptic that is also visually appealing. Due to its slim shape with rounded edges, it fits unobtrusively into the door.

Comfort

With a gentle pull on the open door, it can be closed easily and comfortably. Soft and silent, the door rotates in the middle and automatically centres itself in the closed position.

Quality

All hinges are manufactured in our production site in Germany. Each product is 100% quality tested so that a consistently high product quality can be guaranteed.
